**[Book a Demo](#)**

# Hero Section

## HEADLINE

**Trade direct. Settle certain. No unverified hands in between.**

## SUBHEAD

Corridor One X connects verified producers, exporters, and importers directly. AI matching, autonomous settlement, and escrow-secured payment. The deal you agree to is the deal that closes.

## CTAs

**Primary: [Book a Demo](#) · Secondary: [See How It Works](#)**

## VISUAL

Full-viewport looping video of a container ship moving through open water.

# The Problem

## The Status Quo

### HEADLINE

**Multi-crore deals. Still closed on a phone call and blind trust.**

### BODY

Every year, thousands of producers, exporters, and importers negotiate deals worth hundreds of thousands of dollars through unverified contacts and informal arrangements. No verified identity. No enforceable terms. No protection on the payment. When a deal collapses, and they do, there is no recourse, and the goods, the margin, or the money are simply gone.

### THREE STATUS-QUO CARDS

- 01 Deals negotiated with zero identity verification.**
- 02 No recourse when a deal fails mid-transaction.**
- 03 No infrastructure built for cross-border SME commodity trade, until now.**

# The Corridor One X Approach

## The Corridor One X Approach

### HEADLINE

**Verified before contact. Autonomous through settlement.**

### BODY

Corridor One X does not digitise the old way of trading. It replaces it. Identity is verified before any deal begins. Counterparties are matched by AI across commodity, volume, corridor, and trust history. Terms are locked in a signed Letter of Intent. Payment is held in escrow and released only on confirmed delivery. All of it executes through the platform, without a chain of unverified hands.

### FIVE PILLARS

#### 01 Matching

Counterparties surfaced by AI on spec fit, corridor, volume, and Trust Score.

#### 02 Verify Identity

KYC and KYB clearance before any party can see or send a deal.

#### 03 Autonomous

The platform executes the deal flow end to end, without a chain of intermediaries.

#### 04 Select Settlement

Terms and rails are chosen per deal, then routed and reconciled automatically.

#### 05 Escrow Protection

Funds sit in licensed escrow and release only on confirmed delivery.

# The AI Behind Every Match

## The Intelligence Layer

### HEADLINE

## The AI behind every match.

### BODY

Corridor One X doesn't wait for you to find the right counterparty. Its AI reads every verified listing, requirement, and Trust Score across the network, and surfaces the deals that actually fit, ranked by how likely they are to close.

### SEVEN CAPABILITIES (radial timeline)

#### 01 Ingest — Matches on more than commodity.

The AI weighs commodity type, grade, volume, corridor, price expectation, and trust history together, not just a keyword search. It finds counterparties a manual search would miss.

#### 02 Verify — Works only with verified data.

Every listing and requirement entering the model is tied to a verified entity, so matches are built on facts the network has already checked.

#### 03 Score — Ranks by likelihood to close.

Every match is scored on fit and on both parties' verified track records, so the strongest, safest deals surface first.

#### 04 Screen — Flags risk before it costs you.

The AI reads patterns across verified trade data to surface counterparty and delivery risk early, so a deal is protected before it's signed, not after it fails.

#### 05 Price — Reads the corridor's real pricing.

Live signals from closed trades across the network give both sides a grounded price band, so negotiation starts from evidence rather than guesswork.

#### 06 Monitor — Works while you don't.

The market moves constantly. The AI monitors it continuously and alerts you the moment a matching, verified opportunity appears.

#### 07 Learn — Learns from every closed deal.

Each completed transaction sharpens the model: better matches, better pricing signals, better risk detection with every deal on the platform.

### PULL QUOTE

*"You decide the deal. The AI makes sure the right one reaches you."*

# The Deal Flow

## The Deal Flow

### HEADLINE

**A \$200,000 deal. Closed with certainty. In seven steps.**

### NINE-STEP TIMELINE

#### 01 Listing

Producer or exporter submits commodity, grade, quantity, corridor, and minimum price. Identity verified against GST, IEC, and trade documents. Need a commodity that isn't listed? Corridor One X sources it directly from verified, reliable origins and brings it to you.

#### 02 AI Match

Corridor One X's AI matches requirements against verified counterparties, ranked by spec fit and Trust Score. Identities stay masked.

#### 03 Negotiation

Both parties negotiate through the platform's AI-assisted masked relay. Neither identity is revealed while terms are agreed.

#### 04 LOI Signed

A digital Letter of Intent is signed, with two ways to structure it: directly between buyer and seller, or through Corridor One X, where the platform stands between both parties and takes responsibility for the agreement. Circumvention protection locks the deal to the platform.

#### 05 Samples

Need to inspect before committing? Samples are routed through Corridor One X, so quality is confirmed without either party's identity being exposed.

#### 06 Logistics

Two ways to move the goods: the buyer arranges their own logistics, and seller details are shared to coordinate; or Corridor One X handles logistics end to end, and the seller stays fully masked.

#### 07 Escrow Funded

Buyer deposits into licensed escrow. Counterparty identity revealed.

#### 08 Shipped & Verified

Shipping documents verified. Goods tracked across the route they move: sea, air, or road.

#### 09 Escrow Released

Funds released on delivery confirmation. Trust Scores updated. Deal complete.

# Trust, Verified. Money, Protected.

Trust, Verified. Money, Protected.

## HEADLINE

**Every counterparty verified. Every rupee in escrow.**

### COLUMN 1 — TRUST SCORE (0 TO 1000)

A single number every trader carries, built only from verified, closed-loop signals.

#### Composition:

- KYC and identity — 30%
- Trade history — 30%
- On-time delivery — 25%
- Dispute rate — 15%

### COLUMN 2 — VERIFICATION

Every counterparty cleared before they can transact.

- Business KYB & beneficial ownership
- Export/import licence checks
- Bank & GST validation
- Trade-reference cross-verification

### COLUMN 3 — ESCROW & PAYMENT SAFETY

Regulated, licensed escrow with segregated accounts.

- Milestone-based release (load, ship, deliver)
- Dispute window before final release
- Full audit trail
- Segregated client accounts

# Every Way Goods Move

## Every Way Goods Move

### HEADLINE

**A deal is only closed when the goods arrive. We track every route.**

### BODY

Commodities move by sea, by air, and by road. Corridor One X tracks the shipment across whichever mode fits the commodity, the volume, and the timeline, and holds escrow until delivery is confirmed.

### TRANSPORT MODES

#### 01 Seaways

Bulk port-to-port shipping.

#### 02 Airways

Air freight for time-sensitive cargo.

#### 03 Roadways

Overland and last-mile transport.

### GLOBAL CORRIDORS (map panel)

**Active now:** India · Middle East · Africa

**Coming soon:** Europe · Australia

Footnote: New corridors activate on verified trader demand.

# Who It's For

## Who It's For

### HEADLINE

## One platform. Three sides of the same deal.

### AUDIENCE 1 — PRODUCERS

#### You produced it. Sell it directly.

- If you harvest, extract, or manufacture the commodity yourself, you don't need to be an exporter.
- Reach verified buyers directly, with no trader in between.
- Move low-volume or aging stock before it loses value.

### AUDIENCE 2 — EXPORTERS

#### Stop chasing unverified buyers.

- Verified buyers with real intent on record.
- Get paid through escrow before you take on risk.
- Build a Trust Score that travels with you.

### AUDIENCE 3 — IMPORTERS

#### Stop wiring money into hope.

- Verified suppliers with a proven track record.
- Quality and documents checked before release.
- Funds released only on confirmed delivery.

# The Compounding Advantage

## The Compounding Advantage

### HEADLINE

## Early numbers. Compounding moat.

### WHAT ONLY WE HAVE

- AI-verified matching network
- Trust Score 0 to 1000 per trader
- Identity protected until escrow funds
- Proprietary closed-deal intelligence
- Document verification at every step

### THE DATA FLYWHEEL

Every closed deal generates a verified, closed-loop data point no public database holds: counterparty reliability, commodity grade accuracy, price benchmark, logistics outcome, payment behaviour. By deal 500, Corridor One X holds the most valuable proprietary commodity intelligence dataset in the corridor. By deal 5,000, no competitor can enter.

Milestone marker: Deal 500 → Deal 5,000

### PULL QUOTE

*“The moat is not the technology. It is the data no one else will ever have.”*

# Questions, Answered

## Questions, Answered

### HEADLINE

## The things every trader asks us first.

### Q1

#### How is my identity actually protected?

Identities, contact details, and company names are masked end-to-end during discovery and negotiation. They are revealed only after escrow is funded and circumvention protection is signed.

### Q2

#### What stops a counterparty from going around me after one deal?

Circumvention protection locks every deal to the platform after the LOI, and going around it costs a trader their Trust Score.

### Q3

#### How does the escrow actually work?

Funds are held in licensed escrow and released only on confirmed delivery, with milestone-based release and a dispute window.

### Q4

#### What does the Trust Score measure?

Verified, closed-loop signals only: identity, trade history, on-time delivery, and dispute rate.

### Q5

#### Which commodities and corridors do you support?

Agriculture, food, crude oil, and minerals. India-Gulf corridors are live now.

### Q6

#### What does it cost?

Book a demo for current pricing.

# The Infrastructure for Certain Trade

## HEADLINE

**The infrastructure for certain trade.**

## SUBHEAD

Whether you move 50 tonnes or 5,000, you get the same verification, the same protection, and the same direct access to the global market.
